

Name Font : Tiffany Script

description:

Hi i am Tiffany

"**Tiffany**" is a font with natural representation as a handwritten construction, featuring a straightforward, simple, elegant and very beautiful character. We often get a lot of requests to create signature-style logos, while still giving the feel of a real hand letter. That is the forerunner of the idea that gave birth to this font. "Tiffany" is very suitable and charming for use in brand design needs. Where "Tiffany" has 3 variations of style, one of which has the most eccentric character, which complements all your needs to apply each letter of "Tiffany" more broadly and is more powerful in translating the use of creations. To strengthen the natural accent with the nuances of handwriting, "Tiffany" also presents **132 ligatures** from 2 different types (can be seen between the presentation of the image). In creating fonts, we must think about using them in detail in each letter so that they can be connected with other letters naturally and smoothly. "Tiffany" is the right choice to use watermarks on photography, company logo design, signatures, quotes, album covers, business cards, and even many other design projects. This is where "Tiffany" is here to make your great work look more great, luxurious and amazing.

Font release date: December 10, 2018
